

**TRAY**Cable  
PVC, CPE or LSZH Jacket

Countless

# CONSTRUCTIONS

## TRAY CABLE OPTIONS *for Nearly Every Spec*

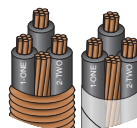

Service Wire stocks over 140 tray cable constructions with the ability to manufacture countless configurations to exact specifications. Available in multiple industry standard color codes, shielded or non-shielded options, and a PVC, ServiceCPE®, or EnviroPLUS® (LSZH) jacket. Service Wire's vast UL 1277 TC-ER compliant tray cable was among the first to secure the 600V/1kV dual rating—setting the precedent for quality and compliance with the latest industry standards.

### THE BENEFITS

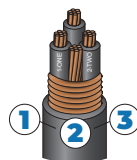

#### Conductor Color Codes

XLPE thermoset conductors are phase identified in industry standard color codes, including E1, E2, and Method 4.

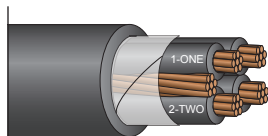

#### Shielded & Non-Shielded

Corrugated or helical copper tape shield and non-shielded tray cable constructions available.

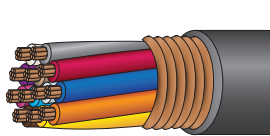

#### Three Jacket Types

PVC, ServiceCPE®, and EnviroPLUS® jacketed tray cable for nearly every engineered spec and application.

#### Non-Shielded

600V/1kV or 2kV  
2-37 Conductors  
#14 AWG – 750 Kcmil

#### Shielded

600V/1kV or 2kV  
2-37 Conductors  
#14 AWG – 750 Kcmil

## DEPENDABLE LEAD TIMES

Eliminate inventory and ship direct to the jobsite with quick leads and dependable, damage-free delivery from any of our nationwide manufacturing facilities.

### JACKET TYPES:

#### Polyvinylchloride (PVC)

Common jacket material suitable for commercial and industrial applications.

#### Chlorinated Polyethylene (CPE)

Designed for uses requiring higher levels of chemical resistance or where exposed to chemical washdown.

#### Low Smoke Zero Halogen (LSZH)

The thermoset LSZH jacket is designed to reduce flame, smoke, and secondary damage in case of fire.

### Compound Selection MATTERS

“Meeting my expectations is tough enough. Service Wire comes through time after time. Product and service are always top notch.”

### TRUSTED CONSTRUCTIONS:

Service Wire's XHHW-2 Tray Cable offers thicker, XLPE thermoset insulation compared to the lower quality PVC used in THHN/THWN tray cable.

Service Wire's XHHW-2/EnviroPLUS® Tray Cable is a great alternative for FR-EPR specs. The thermoset insulation is more durable, 600V/1kV, and -40°C rated. The jacket and insulation are chloride-free, offering added safety and protection in case of fire.
